**Attachments:** DIBP manuscript\_050918.docx; DIBP manuscript\_Supporting information\_041018.docx; Systematic Review Protocol\_Phthalates\_050918.docx

This phthalate manuscripts are really great examples of IRIS 2.0. I'm wondering if we should share the STICS versions with GAO to prove that we actually had a completed product (we already said we off-ramped, but this would provide proof that we did turn them into manuscripts)

What do you think?

Same with HBCD. Maybe we share the draft we gave to TSCA?

Thanks Kris! I made a couple small edits to the paper and the phthalates SR protocol based on Lou's comments from yesterday (removed references to "assessment" and "chemical assessment team"). The updated version is attached here.

In the protocol, I think we should consider switching out the animal study evaluation tables for the new version that the SRWG has developed. Just a thought—seems like they made some major improvements to that section in the new protocol template.

Thanks,  
Erin

This e-mail is to inform you that you have been assigned as the Level 4 Approver on the following clearance submission in STICS:

- Product type, subtype: Journal Article, Peer Reviewed
- Product title: Hazards of diisobutyl phthalate (DIBP) exposure: A systematic review of animal toxicology studies
- Author: Erin Yost
- Initiator: Erin Yost
- ORD Tracking Number: Tracking # ORD-026148

The clearance submission is now available for review:
